

# Sara Pouyanfar

Front End Developer

## About me

I'm a front-end developer who enjoys learning new things and improving myself continuously. I usually pick up new skills quickly and like to challenge myself with different technologies and approaches.

I really enjoy working in team environments where I can collaborate, exchange ideas, and grow alongside others. For me, development is not just about writing code, but about building useful and user-friendly experiences.

## Experiences

### Front-End Developer – Pacific Institute of Technology 2023 Remote

- Collaborated with the front-end team to develop
- Worked on building responsive and user-friendly ui
- Participated in team discussions and code improvements

### Admin Panel Dashboard Remote

- Developed a responsive admin dashboard for managing data and user interactions
- Built using modern front-end technologies with a focus on clean UI and usability
- Implemented structured layouts and interactive components for better user experience
